

THE INFORMATION IN THIS ARTICLE APPLIES TO:
VoiceTracker

SUMMARY

This feature will allow you to record voicetracks between songs, at the end of songs, at the end of commercials, virtually at any point where a VoiceTrack Event is scheduled.

MORE INFORMATION

- Open AVScheduler and open the **Date** you want to Voice Track.
- Click the Voice Track button. VoiceTracker will open:

- Navigate through the schedule to find the first VoiceTrack you want to record.
- Select your AudioVAULT channels on the board and put them in audition.
- Click the **Start Recording** button. When you're ready for the next song to begin, click the **Next** button. When your sequence is completed, click the **Stop** button.
- **Preview** the sequence and use the mouse to slide things around if you need to. You can re-record the voicetrack by just clicking the **Record** button again.
- When you've completed all your VoiceTracks, click **Done**.
- Save the file, **and Export to AVAir**.
